Power Generator Donated to TDP School

A Power Generator was donated to The Dhaka Project School by **PRAMAC** through Rahimafrooz. It is a 22 KVA power generator and can provide full power support to the School Building. The installation process of the power generator began from early May 2010. A RCC floor was constructed behind the School Building with a tin roof to protect it from bad weather. The place was caged to prevent any kind of external damage. The power generator came in operation from May 20, 2010. Power disruption is a common factor in Dhaka. This power generator will provide instant power to generate all electrical equipments of the school building. The students and teachers are happy because it will not hamper their studies anymore. Thanks to **PRAMAC** for the kind donation.
